

## FREE EXPERT ADVISOR e-BJF-FractalsFalseBreakout

### Conception:

Place market Buy order, if the price crossed last Lower Fractal level - PriceOffset downwards.  
Place market Sellorder, if the price crossed last Upper Fractal level + PriceOffset upwards.

Orders closed by StopLoss or TakeProfit.

### Options:

```
extern string _tmp1_ = " --- Trade params ---";  
extern bool QuotesExtraDigit = true;  
// Set true if trade symbol has extra digit after decimal point in the quotes.
```

```
// Example of pairs with extra digit:  
// EURUSD = 1.23457 (5 digits); GBPUSD = 1.55672 (5 digits);  
// USDJPY = 90.137 (3 digits); EURJPY = 101.356 (3 digits)
```

```
// Example of pairs without extra digit:  
// EURUSD = 1.2344 (only 4 digits); GBPUSD = 1.5567 (only 4 digits);  
// USDJPY = 90.13 (only 2 digits); EURJPY = 101.35 (only 2 digits)
```

```
extern bool SupportECN = false;  
// Set true for ECN or STP brokers.  
// This will fix 'Invalid stops' error message  
// because on ECN or STP brokers sl and tp are prohibited on open  
// and can be added only by modification of already opened orders.
```

```
extern int Slippage = 3;  
// Max. allowable slippage value, pips
```

```
extern int Magic = 20120620;  
// Some unique order's ID
```

```
extern double Lots = 0.1;  
// Lots volume
```

```
extern int PriceOffset = 10;
```

// Vertical offset of Fractals levels, pips

extern int StopLoss = 100;

// StopLoss, pips

extern int TakeProfit = 50;

// TakeProfit, pips

---

**You can improve the performance of your expert advisors by adding of some extra options.  
Please see BJF Trading Group inc. offer:**

1.1) Dynamic lot calculation

a) as percent of Account Balance

b) as percent of Account Equity

c) as percent of Account FreeMargin

So on increase of Account Balance/Equity/FreeMargin the lot size will grow too

cost \$65

1.2) Dynamic lot calculation with RiskPcnt option

You will enter an initial risk % of equity you can loose if StopLoss is triggered.

So for any StopLoss size if AccountEquity = 5000 and RiskPcnt = 10.0

then you will pay only 500\$ on StopLoss.

cost \$65

1.3) Dynamic lot calculation by Martingale theory.

New lot will be multiplied by 2.0 (LotFactor = 2.0 is external parameter)

if previous lot was closed in loss.

On first trade closed in profit we reset lot size to initial state.

MaxLot of series will be second external parameter.

cost \$95

Tel: 1.347.329.4439

---

## 2) Possibility to define work days of the week

Example:

// --- Trade days ---

```
extern bool MondayOn = true;  
extern bool TuesdayOn = true;  
extern bool WednesdayOn = true;  
extern bool ThursdayOn = true;  
extern bool FridayOn = false;  
extern bool SaturdayOn = false;  
extern bool SundayOn = false;
```

cost \$45

---

## 3.1) Trade time to open order from hh:mm to hh:mm by ServerTime

Example:

// --- Trade time ---

```
extern bool TTm.Check = true;  
extern int TTm.Start.hh = 8;  
extern int TTm.Start.mi = 0;  
extern int TTm.End.hh = 19;  
extern int TTm.End.mi = 0;
```

cost \$55

---

## 3.2) Close open orders at CloseTime (CloseTime is external param)

- a) only profitable
- b) only losing
- c) all

cost \$45

---

## 4) Sound, Popup, Email alerts on set/open/modify/close/delete of an order

cost \$65

Web: <http://iticsoftware.com>

e.: [support@iticsoftware.com](mailto:support@iticsoftware.com)

Tel: 1.347.329.4439

---

6) Make StopLoss, TakeProfit, TrailingStop hidden to brokers  
In this case EA will manage Hidden (or invisible) stops  
Standard (or visible) stops will be available too

cost \$160

---

7) News trading. i-FF-News indicator used.  
The indicator loads the news from ForexFactory site for all the week  
and updates the news every hour. You can apply built-in filters  
to get only important news.

We offer to update your expert

- a) close opened trades X minutes prior important news
- b) stop new orders between X minutes prior and Y minutes after important news

cost \$190

---

8.0) Breakeven function  
Moves StopLoss to breakeven level when trade is in profit by X pips  
cost \$45

---

8.1) Standard Trailing: simple trailing, stoploss follows by the market  
cost \$45

8.2) High/Low Trailing: trailing by bars High/Low  
cost \$45

8.3) MA Trailing: trailing by MovingAverage indicator  
cost \$45

8.4) ATR Trailing: trailing by ATR indicator  
cost \$45

8.5) Fractals Trailing: trailing by Fractals

cost \$45

8.6) PSAR Trailing: trailing by Parabolic Stop And Reverse indicator

cost \$45

8.7) ProfitPcnt Trailing: trailing with lock of some pcnt of max. profit reached

cost \$45

8.8) TLine Trailing: trailing by some TrendLine added manual on the chart

cost \$45
